

Dr. Mohammad Abdus Salam

First Muslim Nobel Laureate in Science

Jhang, Pakistan • 1926–1996 CE

Champion of Science in the Developing World

Dr. Abdus Salam revolutionized theoretical physics by co-formulating the Electroweak Theory, which proved that electromagnetism and the weak nuclear force are aspects of a single fundamental interaction. Awarded the 1979 Nobel Prize in Physics, he was a passionate advocate for science in developing nations and founded the International Centre for Theoretical Physics (ICTP) in Trieste, Italy.
