

Muhammad ibn Musa al-Khwarizmi

The Man Whose Name Gave Us 'Algorithm'

Baghdad, Abbasid Caliphate
c. 780–850 CE

Pioneer of Modern Computing

Al-Khwarizmi transformed mathematics by establishing algebra as an independent field and developing systematic methods to solve linear and quadratic equations. His revolutionary works introduced Hindu-Arabic numerals to the West, while his Latinized name, Algoritmi, gave birth to the word algorithm—laying the core foundation for modern computing and AI.
